

September 23, 2008

The QMA National Board would like to make all of our members aware of the current effort by USAC to put together a quarter midget racing program that masks the program already in place by our organization. The National Board does not support this effort and considers these efforts to be unethical and completely unprofessional. QMA attempted to work with USAC for eight years and they did not offer any of the support they promised other than serving as a management company. Now they are soliciting our members with the offer of support and promotion.

Quarter Midgets of America, which is celebrating their 50th anniversary in 2010, has always been an organization run by members, on behalf of their **children**, who volunteer their time to promote this sport across the country. It has always been a member driven organization where each and every member has a voice. We have a Rule Change Proposal process, as well as a voting process in place that ensures this. All current rules, procedures, engine platforms, safety procedures, and technical specifications are all based on the input and expertise of our members. Every member of QMA has a say in how the organization is run. USAC does not offer this opportunity. While QMA is a not for profit organization USAC is a profit driven organization.

As with all organizations not every member will agree with all rules and procedures, but please keep in mind Quarter Midgets of America's mission statement has been and will continue to be "...to create and maintain a clean, safe, healthy sport, which may be enjoyed by all family members in a close relationship with good sportsmanship toward all". Quarter Midget racing is the only sport we promote and our efforts are not diluted by our commitment to other forms of racing. For fifty years all officers from the national level down to the local level have dedicated themselves to do what is best for our children and to teach them true sportsmanship.

QMA National Board
